

Dear Client

HOLDEN BUILDING SOLUTIONS TESTIMONIAL

At Mount Carmel we have worked and known Carl for 3 years. During that time he has been instrumental in many major projects that have taken place at Mount Carmel.

Most noticeably is the creation of the school's Chapel. Carl was involved from concept to completion attending project meetings and providing solutions to problems as and when they occurred. A particular highlight to this project was the door to The Chapel which Carl designed after listening carefully to what we were trying to create. His creative design of this door contributed to the overall effect we were looking for which was to create a special spiritual place of worship.

Please follow the link below to our website for images of The Chapel.

Carl was also heavily involved in the total transformation of our school dining facilities. Again, this was a whole school project involving many stakeholders.

As well as the above, Carl has project managed other works at the school including; creation of new staff work room, refurbishment of classrooms and offices and much more.

We have commissioned Holden Building Solutions to undertake work over the summer which includes the creation of a new office which is a challenging project but one in which I have complete faith that Carl will deliver on time and on budget and to the exact specification.

We would not hesitate in recommending Holden Building Solutions to anyone, as their attitude to safety, customer care and attention to detail is outstanding. They have a 'can do' attitude and instead of bringing problems to the table they bring and develop solutions instead.

If you would like to discuss this testimonial in further detail please do not hesitate to contact me or the Assistant Site Managers, Bob Smith or Peter Stokes.

Please see below a quote from our Assistant Site Managers:

Carl has worked for us on both large and small contracts and has been successful in changing what started as an idea into a reality without complication. His attitude to health and safety, cleanliness and attention to detail from start to finish are second to none.

Carl has a great team who are always happy to go the extra mile to ensure that the job is completed within the time schedules we have to work with. Being a school this is important as we must be fully functional and back to normal at the start of any new term.

Carl has the ability to provide you with what you want to the highest standard and therefore we would not have any hesitation in recommending Holden Building Solutions to any potential customer and would be more than happy to be contacted for any information you may require with regards to using them as a contractor in your premises.

Yours faithfully

Sharon O'Brien
